To Whom It May Concern,

Since joining the Pre-K program, my daughter has excelled in all areas of her life. First of all she has learned and almost mastered writing her letters and is in the beginning stages of reading. My daughter has also learned new ways of communicating her feelings. By interacting with the other children and staff she has built interpersonal skills. I can't express the gratitude I have for her teachers and the rest of the staff that works with her daily. What they do is amazing.
